

2026-2027 NEO Regional Prisms VR Network

The NEO Regional Prisms VR Network meets twice each school year for half-day collaborations at the ESCNEO.

The audience consists of Mathematics educators, Science educators, and curriculum specialists who want to stay abreast of new content in Prisms VR modules, share lessons learned in classroom implementation, explore the student experiences and teacher dashboards, and access the proliferating ancillary lesson resources.

We encourage educators from the nine pioneering districts in NEO as well as other interested regional Math and Science educators to attend the network meetings and stay abreast of new content

New content was released in 2025, with 35 new Math and Science modules and/or mini-modules, and in 2026, with 33 new modules.

Meetings

8:30 AM - 12:00 PM

October 16, 2026

Spring Date TBD
